

# Daniel Clerkson

Front-End Developer · React / Next.js / TypeScript

Kano, Nigeria · +234 813 967 4212 · danielclerkson68@gmail.com · [daniel-clerkson.vercel.app](#) · [GitHub](#) · [LinkedIn](#)

---

## SUMMARY

---

Front-End Developer with 2+ years of hands-on experience building production-grade web applications. Currently serving as Lead Front-End Developer at ReliAssist, where I drive technical decisions, lead implementation on client-facing products, and mentor junior contributors. Proficient in React, Next.js, TypeScript, and Supabase. Pursuing a B.Sc. in Software Engineering at Bayero University Kano.

## TECHNICAL SKILLS

---

**Languages & Frameworks:** JavaScript (ES6+), TypeScript, React, Next.js, HTML5, CSS3

**Backend & Data:** Supabase, GraphQL, RESTful APIs, NextAuth v5

**UI & Styling:** Tailwind CSS, shadcn/ui, Material-UI, Framer Motion

**Tools & Platforms:** Git/GitHub, Vercel, Vite, Linux (Fedora/KDE), Bash

## WORK EXPERIENCE

---

**Lead Front-End Developer** · [ReliAssist](#) · 2025 – Present

- Promoted to lead role, owning front-end architecture and technical direction across active client projects.
- Integrated Hashnode as a headless CMS into a Next.js platform via GraphQL API, enabling dynamic content publishing without a custom backend.
- Reduced page load times by ~25% through code splitting, lazy loading, and component optimization.
- Collaborated with a cross-functional team of ~10 to ship responsive, production-ready interfaces.
- Set up and maintained deployment pipelines on Vercel with environment-based configuration.

**Front-End Developer Intern** · [STEMLabsNG](#) · 2024 – 2025

- Built 10+ responsive UI components using React, Tailwind CSS, and TypeScript under production conditions.
- Integrated RESTful APIs across 5+ features, coordinating with backend engineers on data contracts.
- Applied UX principles to improve interaction patterns across core product flows.

## FEATURED PROJECTS

---

**Sanctuary** — Full-stack church management app with Google OAuth, member profiles, and real-time data.

**Stack:** Next.js · TypeScript · Supabase · NextAuth v5 · Tailwind CSS · Vercel

**BLW Teens Kano** — Fellowship platform for a local teens chapter — event listings, announcements, and member resources.

**Stack:** React · Supabase · Tailwind CSS

**YC-Inspired Pitch Platform** — Startup pitch platform with CMS-driven content, authentication, and 50+ live project entries.

**Stack:** Next.js · TypeScript · Sanity CMS · NextAuth · Tailwind CSS

**Vysk Catering** — Food ordering platform with vendor management, customer accounts, and real-time order tracking.

**Stack:** React · Tailwind CSS · API Integration

## EDUCATION

---

**B.Sc. Software Engineering** · Bayero University Kano (BUK) · Expected 2029  
**Relevant Coursework:** Web Development, Software Design, Data Structures & Algorithms
